***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to a composite article, classified in class 428, subclass 457+.
  - II. Claims 16-26, drawn to a method of making a composite article, classified in class 156, subclass 182.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the present applicant, the product could be made by a materially different process. For example, the polymer substrates could be formed on the diffusion inhibiting layers. Alternatively, said layers of the composite article could be co-extruded.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Multiple telephone calls were made to Toan Vo on Wednesday, March 30, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. There was no answer at the phone number of record.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
